Introduction

Authentication System

Firebase

Admin Feature Area

Using Firebase

Database

Used to store app data

Server

Need to configure
server to host
database

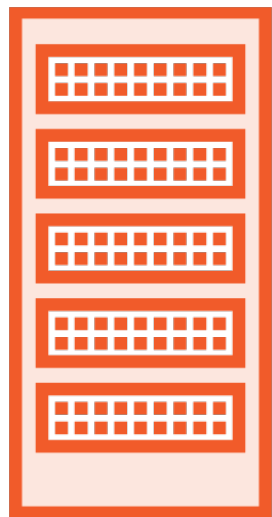

Firebase

Cloud-based database

Firestore Services

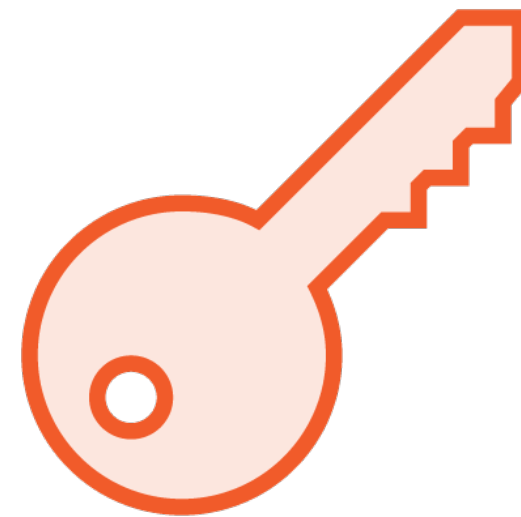

Storage

Hosting

Messaging

Authentication

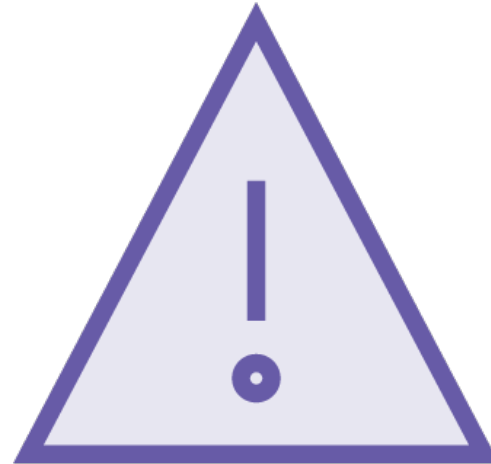

Firestore Authentication

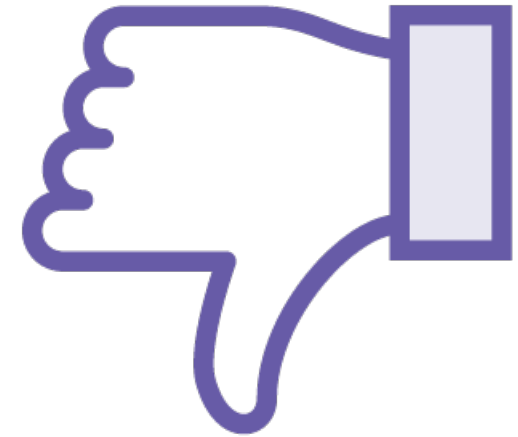

Authentication

We will use
email/password
Authentication

Email

Firestore will verify
email address

Password

Firestore will enforce
password
requirements

Demo

Preview Admin Feature area

Create User account

Logout

Login

Summary

Authentication System finished

Firestore authentication

Ready to use Real Time Database
